Dear Harold:

6/25/71

Of course, the key phrase in the "Medical" article is "not inconsistent with the facts as presented to us."

Obviously, one must ask the question the "presentation" and if the "facts" were "undoubted" facts at all.

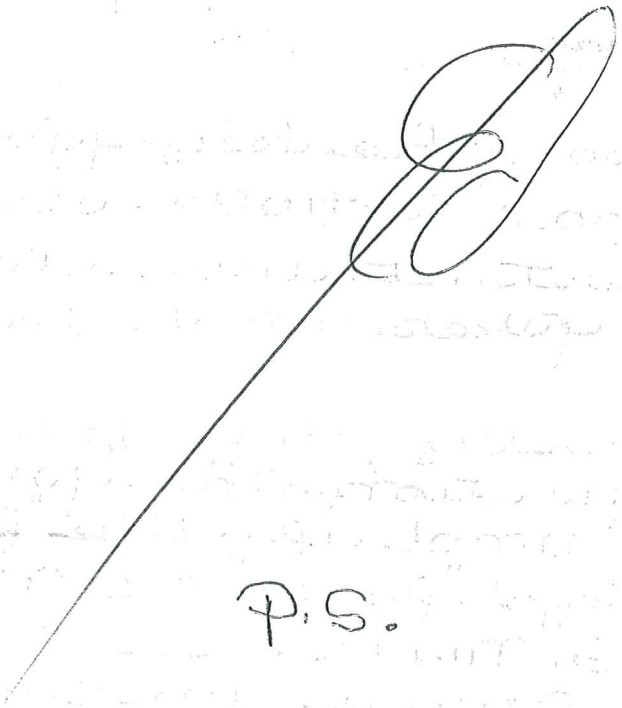
The "N.G." matter is tragic. One can agree in general areas with what he posits but as to his evaluation of material the approach becomes novelistic or projections of fantasies ----.

The Bradley matter was fantastic.

Mistaken identity or misinformation of a deliberate matter. I wonder.

As the Medical News notes, Nov. 22, 1963 did mark an historical turning point".

Best Wishes,



P.S.

In a few throwaway lines of his new book, The Age of Flying Saucers, Flammonde provides a key to Garrison's mental status by delineating his questioning of Fred L. Crisman, architect of the Maury Island Flying Saucer Hoax and Raymond Brookards, a.k.a. I.A. "Saucer" Bubb". Perhaps, "Aliens" were suspected. Ha Ha!
